PH NEUTRALIZATION SYSTEM

SUGARBUSH WASTEWATER NEUTRALIZATION SYSTEM

This system provides reliable, flexible, and powerful control for the treatment of wastewater discharged from reverse OSMOSIS. No matter the manufacturer or the model.

Allows the neutralization of washing water pH before its release into the environment

Smart control box with easy-to-use touchscreen

Remote management and real-time data consultation

Data recording of all sensors allowing the creation of tables and graphs. Transferable to USB key. Useful for providing reports required by environmental authorities.

Integrated management on automated D&G Osmosis

Piping entirely in stainless steel

Completely autonomous

Government grants available
