

MODIFY YOUR EXISTING PUMPS

COOLING UNIT FOR "FLOOD" OIL RECLAIMER

- Cooling unit lets vacuum pumps operate up to 27HG
- This system necessarily operates with the "FLOOD" oil recuperator
- The majority of oil injected into the pump is reclaimed by the "FLOOD" oil reclaimer and the cooling unit will cool down before it returns to the pump.
- Temperature control controls the radiator fan according to the oil temperature.
- This system works with all oil and water-recirculation vacuum pumps
- Fits all cold oil model pumps (De Laval, Universal, Elmira)
- Injects 2 litres of oil/minute to cool pump for maximum efficiency
