## SAP LIFTERS WITH MANIFOLD

A

A

### SINGLE (UP TO 350 TAPS)

**400582** Sap lifter with manifold (DG 555)  
Double (up to 800 taps)

B

B

### DOUBLE (UP TO 800 TAPS)

**400599** Sap lifter with manifold (DG 555-2)

- Requires high-level vacuum (20 to 29 HG)
- Makes it possible to collect sap from trees on sites lower than the main pumping station
- Maximum elevation drop of 15 feet
- We recommend the installation of this unit in a temperate place between
- 1° and 5° celsius to avoid frost
