| 2q   | 558047  | 750ml (82mm)                      |

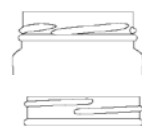

### JAR FINISHES:

A closures' finish, (the way it fits on the container), can also help you decide which is best for your product.

**LUG or TWIST (TW)** is used for hot fill products. It utilizes the steam from the hot product to draw a vacuum and seal the product inside.

**CONTINUOUS THREAD (CT)**, or screw type, is mostly used for cold fill products.

### FINITIONS DE JAR:

Une finition de fermetures, (la façon dont il se place sur le récipient), peut également vous aider à décider lequel est le meilleur pour votre produit.

**LUG ou TWIST (TW)** est utilisé pour les produits de remplissage à chaud. Il utilise la vapeur du produit chaud pour faire un vide et sceller le produit à l'intérieur.

**LE FIL CONTINU (CT)**, ou type à vis, est principalement utilisé pour les produits de remplissage à froid.

## Tall Cylinder Jars / Pots cylindres longs

| Ref. | DG Code | Description                |
|------|---------|----------------------------|

Dimensions: 6 ¾" x 2 ¼"

## FARM GATE:

Farm gate is defined as honey produced in a producer's apiary and sold at the producer's place of residence directly to the consumer.

### LABELLING FOR FARM GATE SALES:

- words "honey/miel"
- the name and full address of the producer or packer.  
A full address means providing enough info. to identify the exact location of the producer's premises, such as a municipal address or property identification number, including a postal code.

## RETAIL:

Honey sold from any other location other than the producer's place of residence is considered "retail" honey.

### LABELLING FOR RETAIL SALES:

- words "honey/miel"
- the name and full address of the producer or packer.  
A full address means providing enough info. to identify the exact location of the producer's premises, such as a municipal address or property identification number, including a postal code.
- grade
- net weight
- a notice that comb honey contains cells of pollen, when that is the case
